Part Specifications

Cover Material: Plastic

Terminal Pin Qty.: 4

Description: Deslugger Clutch Timer

Number of Terminals: 4

Warranty: 120 days

Mounting Hardware?: Not Included

Meets / Exceeds OEM?: Yes

Heatsink Protected?: No

Mount Type: bolt on

Bracket?: w/o Bracket

Skirt?: No

Style: Compressor Timer

Terminal Gender: Wire Lead

Terminal Type: Wire Lead

Type: Relays

Voltage: 12

Amperage Rating: 30

Features & Benefits

Our products are engineered and tested to provide years of trouble free operation. Backed by over 50 years of mobile a/c experience, fix it once and fix it right with Everco Heavy Duty.

- Patented Four Seasons part that fixes the common OE problem of slugging Compressors and extends compressor life as well as solving the problem of a noisy, shaky compressor at start up which can damage the A/C system
- To eliminate system damage, the timer will cycle the compressor multiple times to push the pooled oil and refrigerant out of the compressor gradually before normal operation to help protect the compressor.
- When not used the compressor has to work much harder to push all of the oil out at one time causing stress on the system.
- For use on 06-02 Honda CRVs with Scroll Type Compressor
- Instruction sheet included

Part Type (Category)

Transmission Oil Coolers
