

NIGHTSPIRE®

NOW FEATURING ENHANCED BRIGHTNESS, DUAL CONTROLLER FUNCTIONALITY, AND IMPROVED LIGHT HEAD MOVEMENT

Federal Signal is excited to announce the latest updates to NightSpire®, showcasing a blend of innovation and precision that takes functionality to the next level. Retaining its core features – adjustable spot-to-flood capability, 360-degree continuous rotation, and 130 degrees of vertical tilt – this enhanced model offers significant advancements to elevate your experience. With a 30% boost in brightness, the addition of dual-controller functionality, and improved light head movement, this product is designed to maximize work zone safety.

Enhanced Brightness

Brightness is a critical factor when it comes to achieving superior visibility while on the work site, and NightSpire has raised the bar. Now 30% brighter, this light delivers an impressive 204,000 candela, offering visibility in the darkest and most demanding conditions.

Dual-Controller Functionality

For greater versatility and convenience, the NightSpire now supports dual-controller functionality, allowing you to control a single light with two controllers. This means you can controller NightSpire from a dash-mounted, ignition-powered controller inside your vehicle and seamlessly switch to a wireless, battery-powered controller when you're outside the vehicle. Each controller can still pair up to three lights, if needed, and has two memory control functions.

Improved Light Head Movement

The NightSpire's upgraded light head movement brings smoother and more precise control than ever before. These improvements ensure effortless control and refined performance, allowing you to focus on the task at hand with minimal distraction or effort. Still engineered with a digitally-controlled lens, NightSpire adjusts from 50-degrees of floodlight to a pinpoint spotlight at 4-degrees.

HOW TO ORDER

MODEL	DESCRIPTION	2025 LIST PRICE US\$
NS200-P-SB	Permanent/1-inch pipe mount, battery-powered Bluetooth® wireless controller	\$910.00
