A superior warning light

The 4x3 QuadraFlare DOT models are designed with a unique reflector technology to re-direct light for a superior off-axis warning. The 4x3 QuadraFlare DOT models fit in a Federal Signal DOT mounting box and have a unique lens featuring a slight vertical curve to allow the units to “stack” in the mounting box creating a clean look leaving minimal space between the lights or the box for moisture or dirt.

Brake/Tail/Turn and Back-up Lights

The 4x3 QuadraFlare DOT models also come in Brake/Tail/Turn and Back-up models. These models are ideal for applications using the Federal Signal mounting boxes and are designed with the same lens as the 4x3 QuadraFlare warning light providing outstanding light output to meet FMVSS 108, SAE J1398 and SAE J593 specifications.
